New Machines & Prototypes
New Machines

BABY DIAPERS MACHINE

Speed: up to 500 pcs/min.

B 300 - Mechanical
B 400 - Hybrid
B 500 - Full Servo
- High ratio SAP;
- Core Processor;
- Adl / Acquisition layer;
- Side panel;
- Large cuffs.

FIG.: Baby diaper
New Machines

SANITARY NAPKINS & PANTY SHIELDS MACHINE

SANITARY NAPKINS & PANTY SHIELDS MACHINE

**Speed:** up to 1,000 pcs/min.

**SN 400** - Mechanical

**SN 800** - Hybrid

**SN 1200** - Full Servo

**PS 800** - Hybrid

**PS 1200** - Full Servo

- Fluff / Ultrathin / Combo;
- ADL / Acquisition layer;
- With / without Wings;
- Flat / Trifolded;
- Stacker included;
- HMI / Servomotor driven.

ADULT DIAPERS MACHINE

**Speed:** up to 250 pcs/min.

**AD 150** - Mechanical
**AD 250** - Hybrid
**AD 300** - Full Servo

Adult incontinent diaper production line equipped to produce **small**, **medium**, **large** and **extra large** incontinent / adult diaper sizes, with the possibility to produce as well **Underpads**.
UNDERPAD MACHINE

Speed: up to 250 pcs/min.

UND 150 - Mechanical
UND 250 - Hybrid
UND 300 - Full Servo
  • Core processor;
  • High pad definition;
  • Without tissue;
  • Stacker included.
New Machines

**ROOFING MACHINE & LAMINATION LINE**

**Speed:** up to 200 pcs/min.

**LAM 200** - for Lamination of different materials

**DIMENSIONS OF THE OUTPUT REELS**
- Reel diameter: from 100 up to 400mm
- Inner core diameter: from 1" up to 3"
- Reel width: from 1000 up to 3000mm
- Reel weight: <= 40 kg
- **Optional:** up to 5 webs junction to reach a total width up to 16,000 mm.
New Machines

RAW MATERIAL

**Speed:** up to 200 pcs/min.

- **FT 200** - for Frontal tape manufactured
- **ET 200** - for Elastic side tape manufactured

The machine laminates a wide range of materials with high accuracy to produce frontal tape, elastic and non-elastic closure tapes (adhesive and mechanical closure).
PROTOTYPES

PROTOTYPES FOR:

- Finished product;
- Raw material;
- Applicators;
- Customization;
- R&D;
- Consultant:
  - 3D Design Department.

UPGRADING & RETROFITTING KITS

SIMPLE SIDE PANEL
FOR - ADULT DIAPERS - BABY DIAPERS

Side panels are today’s diaper standard features for the following reasons:

- **SAVINGS - QUALITY - INNOVATION**
  Our simple Side Panels Kit allows important savings on raw materials consumption of Cellulose, Nonwoven topsheet, NW cuffs, Poly backsheet, construction glue and tape tabs.

- **MACHINABILITY**
  Our kits eliminate the use of the shaping unit and reduce the frontal tape size, procuring better machinability, faster size changeover, less maintenance cost.

- **ENVIRONMENTAL FRIENDLY**
  the reduction of 30% of the raw materials employed to make such disposable products has an important reduction of environmental impact from industries and consumers’ wastes.

- **PRODUCTS’ RELIABILITY and STABILITY**
  Our side panels guarantee the best fitting and product stability on the body.

- **PRODUCTS’ FRESHNESS**
  The application of the nonwoven panels allows a reduction of the surface of the side materials, to benefit of the consumers that wear products with breathable sides.

- **ADJUSTABLE PRODUCTS**
  The side positioned velcro tabs allow the best fitting.

FOR ADULT DIAPERS
- LIGHT INCONTINENCE
- BABY DIAPERS

SAVINGS - QUALITY - INNOVATION
Our belt Retrofitting Kits allow important savings on raw materials consumption of Cellulose, Nonwoven topsheet, NW cuffs, Poly backsheet, construction glue, frontal tape and tape tabs.

MACHINABILITY
Our patented belt kits eliminate the use of the frontal tape applicator and of the shaping unit, procuring better machinability, faster size changeover, less maintenance cost.

ENVIRONMENTAL FRIENDLY
the reduction of 30% of the raw materials employed to make such disposable products has an important reduction of environmental impact from industries and consumers’ wastes.

PRODUCTS’ RELIABILITY and STABILITY
Our patented belts guarantee the best fitting and product stability on the body.

PRODUCTS’ FRESHNESS
The application of the nonwoven belts allows a reduction of the surface of the side materials, to benefit of the consumers that wear products with breathable sides.

CONSUMERS’ AUTONOMY
The consumers can easily pull on and take off the diapers in 2 steps, without any external help. Step 1, the belts are laced on the abdomen. Step 2, hook the diaper directly on belts laced on the abdomen.

ADJUSTABLE PRODUCTS
The side positioned velcro tabs allow to adjust the belts on any abdomen size for the best fitting.

SELECTED II HAND MACHINES & EQUIPMENT

At present we propose a wide range of pre-selected second hand machines with good references. Our second hand machines are available on the market on Ex-Works conditions, “as is, where is”.

Nevertheless, we can offer, separately and upon request, together with the second hand machine of your choice, the services for dismantling, loading, shipping, re-assembling, start up and even updating and refurbishing by specialist of the field.

Upon the request, we would be glad to send you its complete available second hand machine list, helping you to choose the right machine.

www.sanipro.it/machinery_prod/second_hand
www.sanimac.it

Our offers and detailed information are sent upon specific request made on a specific machine.

Proposing you the best references on the market, we select and sell the best second hand machines ever (depending of the availability) for:

- ADULT INCO,
- BABY DIAPERS,
- FEMININE PRODUCTS,
- GLUE EQUIPMENT,
- OTHER MACHINES,
- PACKAGING MACHINES.
